MATCEN (Rongma Cen)

AI Workflow Builder & B2B Growth Specialist — Websites, SEO/GEO, Paid Social, AI Prospecting

Born 14 Dec 2003 · Shenzhen, China · Open to relocation (Australia, New Zealand, Japan, USA, Europe) and remote roles romancenanyi@gmail.com · +86 136 1031 4007 · github.com/romancenanyi-png

PROFILE

In foreign trade since 2023, from order follow-up to marketing operations. Hands-on AI operator who turns ChatGPT (Codex) and Claude into a working team for real business results. I build and run B2B export websites, SEO/GEO content, Facebook ad funnels, social video, and buyer prospecting — with AI doing about **80% of the execution** and me doing the **20% that matters**: diagnosis, fact-checking, approval and quality control.

Since deploying AI on our company website at the end of July 2026, the site has generated **150+ organic inquiries**. I learn fast and ship fast: within four months of mastering AI agents (April 2026) I turned them into a working lead-generation system. I am now extending this with Python, API integrations and agent orchestration to build CRM and automated sales workflows for export teams.

KEY RESULTS (JUL – NOV 2026)

Area	Result
Website SEO/GEO	**150+ organic inquiries** since AI deployment (end of July 2026), still growing
Website quality	Independent SEO audit score **90/100 (A)**; 147 indexable pages with complete, unique titles, meta descriptions and H1s
Facebook ads	Since late Aug 2026, total spend ~RMB 2,500 (≈ USD 350): **lead-form ads 15 leads (3 in active follow-up)**, **engagement ads 40+ leads (7 in follow-up)**
AI prospecting	**28 inquiries, 12 in active follow-up** from Google Maps and social-media prospecting
Social & video	Facebook, YouTube and TikTok content planned and edited with AI (80% AI / 20% human review)
Engineering	AI-assisted electrical CAD drawing planning reaching **~95% match** to the client's requirements
Office automation	Daily documents, spreadsheets, reports and data analysis handled with AI; researching AI-built CRM and quotation systems

EXPERIENCE

AI Growth & Operations Specialist — Shenzhen Hongzhao Handbag Co., Ltd.

Shenzhen · Sep 2025 – Present · Outdoor & sports bag OEM/ODM factory, B2B export

Started in export order follow-up and moved into website, marketing and AI operations.

B2B website & SEO/GEO (owner of the company website)

- Rebuilt the English B2B site with Codex and Claude: 11 product categories, 86 product pages, customization hub, buyer-type landing pages (Solutions), and category customization pages.
- Ran the full SEO/GEO cycle: competitor keyword research in Semrush, keyword-to-URL mapping, indexing diagnosis in Google Search Console, on-page rewrites, structured data, internal linking and full-site re-checks.
- Diagnosed with the relevance × authority × user-satisfaction model; fixed the weakest factor (trust evidence) by aligning site claims with certificates and audit reports and replacing AI images with real factory photos.
- Results: 150+ organic inquiries; B2B keyword coverage in page body copy from 6/172 to 92/172; product-page duplicate content from 52% to 22%; mobile PageSpeed up to 96; WordPress editor load time from 80 s to 6.2 s.

Facebook paid social & automated analysis

- Launched lead-form and engagement campaigns from late Aug 2026; total spend ~RMB 2,500 (≈ USD 350).
- Built AI workflows that pull campaign data, analyze cost per qualified lead, score leads and suggest the next single variable to test.

- Lead-form ads: 15 leads, 3 in follow-up. Engagement ads: 40+ leads, 7 in follow-up.

AI content & video (Facebook, YouTube, TikTok)

- AI plans pain-point scripts, shot lists and posting calendars; automated editing with CapCut (JianYing) drafts and programmatic video (HyperFrames).
- Workflow in production since April 2026: AI handles ~80% of the work; I review, check claims and approve.

AI-driven buyer prospecting

- Researched buyers on Google Maps and social media with AI: narrow search formulas, official-source verification, de-duplication, A/B scoring and personalized outreach.
- 28 inquiries; 12 in active follow-up.

AI office automation & internal tools

- Use AI daily for documents, spreadsheets, reports, file organization and data analysis.
- Researching and prototyping AI-built business systems such as a CRM and a quotation system for B2B orders.

Export Order Follow-up — Foreign trade company

Shanghai · Feb 2025 – Aug 2025

- Order processing, supplier and customer communication, shipment follow-up.

PROJECTS (PRIVATE — LIVE DEMO AVAILABLE ON INTERVIEW)

- **B2B Website SEO/GEO Knowledge Base** — 10-stage website roadmap and a real factory-site case study.
- **B2B Website Audit Toolkit** — find fatal SEO, trust and conversion issues in 30 minutes; read-only Python audit script.
- **AI Skills Library** — 40 installable skills for Codex and Claude Code covering websites, SEO/GEO, Facebook, prospecting and video.

SKILLS

- **AI tools:** ChatGPT / Codex, Claude / Claude Code, AI agents, prompt and skill design, multi-agent review workflows
- **Web & SEO:** WordPress, Elementor, Rank Math, Google Search Console, GA4, GTM, Semrush, Screaming Frog, PageSpeed, structured data, GEO (AI search visibility)
- **Marketing:** Facebook Ads (lead forms, engagement), Meta Business Suite, content strategy, B2B buyer pain-point research, lead scoring
- **Content & video:** CapCut / JianYing automation, HyperFrames, AI video prompting, YouTube, TikTok
- **Business systems:** AI office automation; CRM and quotation-system prototyping with AI
- **Currently learning:** Python data processing and API integration (OpenAI, Claude, CRM), Dify / Coze / LangChain agent orchestration
- **Other:** AI-assisted electrical CAD drawing planning, Python scripts with AI, Excel/data analysis
